GAM Product #PM101  
Rosco Product # 250 / 8010 10660

Pattern # Spaceship B inside tent at Cal Arts

## PRODUCT DESCRIPTION

The GAM Gobo Pattern is an important tool for every lighting project and can be used in many ways. Patterns create 'background looks' when projected on scenery, on walls, floors, or on a cyclorama. Patterns can 'break up' the light used to illuminate people. Some patterns can create positive (light) designs, while other patterns are used to create negative (shadow) designs. Patterns can be used as an animation device, to create the illusion of fire, water, twinkling stars and much more. The Great American Pattern will enhance your creativity and has limitless applications.

Combining Patterns into new scenic elements is easy and economical, it offers the lighting designer a lot of opportunity to be extremely creative. Two examples below:

Witch with Clouds and Mountains  
Patterns #601, #864 and #255

Fence and Clouds  
Patterns #864 and #568

Combinations of GAM Gobo Patterns can be explored by clicking on the Virtual TwinSpin™ interface at Gamonline.com. Select any two Patterns and superimpose them to see what they might look like in the gate of an ellipsoidal spotlight.

## PRODUCT SPECIFICATIONS

GAM Steel Patterns are manufactured in .006" thick stainless steel except some halftone patterns in .005" thick stainless steel. GAM Patterns also come in glass and custom designs are available.

### GLASS

- Single Color
- Multi Color
- Grayscale
- Black & White
- Full Gradients and Shading
- Any Design, Any Tolerance

### STEEL

- Black & White
- Design must be altered and bridged (if necessary) within limited tolerances dependent on pattern size

Bridges must be inserted to maintain physical structure for steel patterns, if not, the center of these letters would fall out.

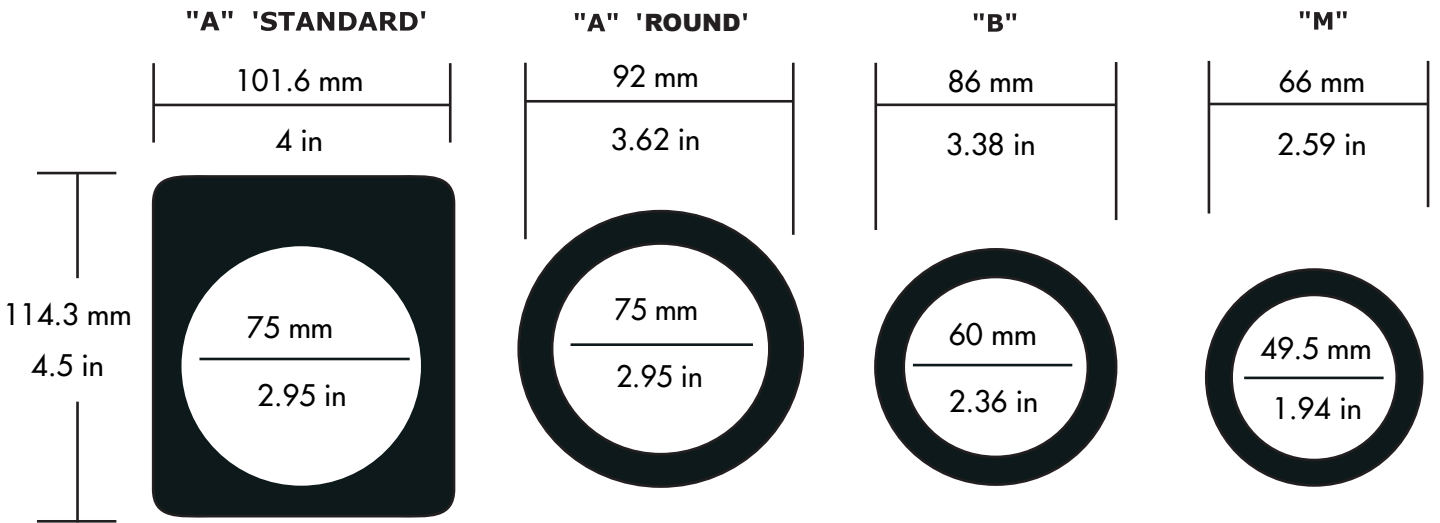

## GAM PATTERN SIZES AND ADAPTERS

Industry standard basically dictates three common pattern sizes; the A,B and M sizes ranging from 2.56" to 4" in diameter. Other sizes do exist and are illustrated on the following page.

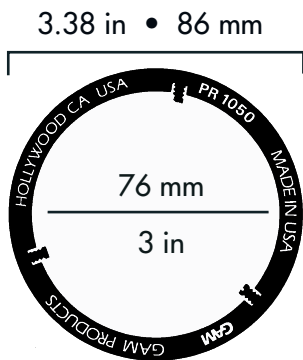

GAM Pattern adapters are designed to enable patterns to fit into devices that are a slightly different size. The following page illustrates the various adapters with dimensional information. The pattern being mounted in the adapter is held under the three tabs. First, bend the tab up, set the glass or metal pattern into the ring, then bend the remaining lip of the tab over the pattern to hold it in place.

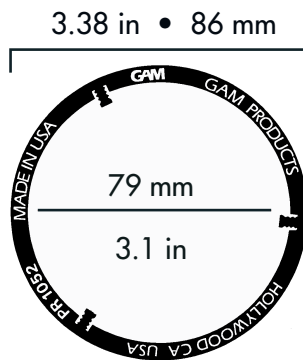

# THE GREAT AMERICAN PATTERN SIZES

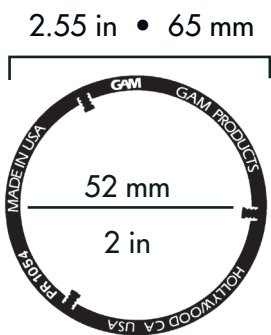

## PATTERN AND GLASS ADAPTERS

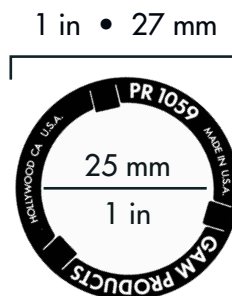

**PR1050**  
Glass Adapter

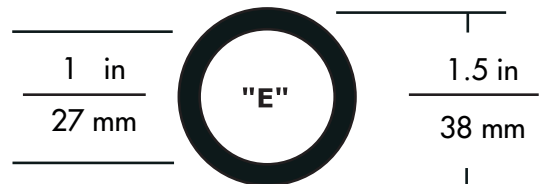

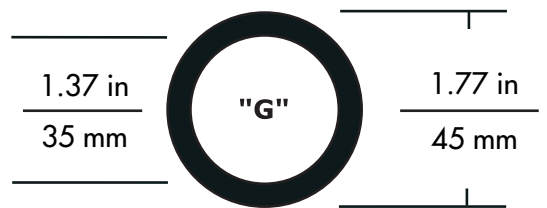

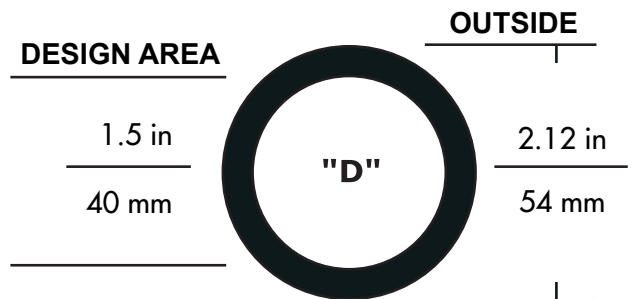

**PR1052**  
Glass Adapter

**PR1054**  
Glass Adapter

**PR1059**  
V' to MAC 500 & PRO 918

## PRODUCT NUMBER

---

### For all patterns:

E size: add PEE before Gam number/ add 0375 to suffix for Rosco number

G size: add PGG before Gam number/add 0650 to suffix for Rosco number

M size: add PMM before Gam number/add 0660 to suffix for Rosco number

B size: add PCB before Gam number/add 0860 to suffix for Rosco number

A size: add PAA before Gam number/add 1000 to suffix for Rosco number
