

GAMTUBE™ INSTALLATION

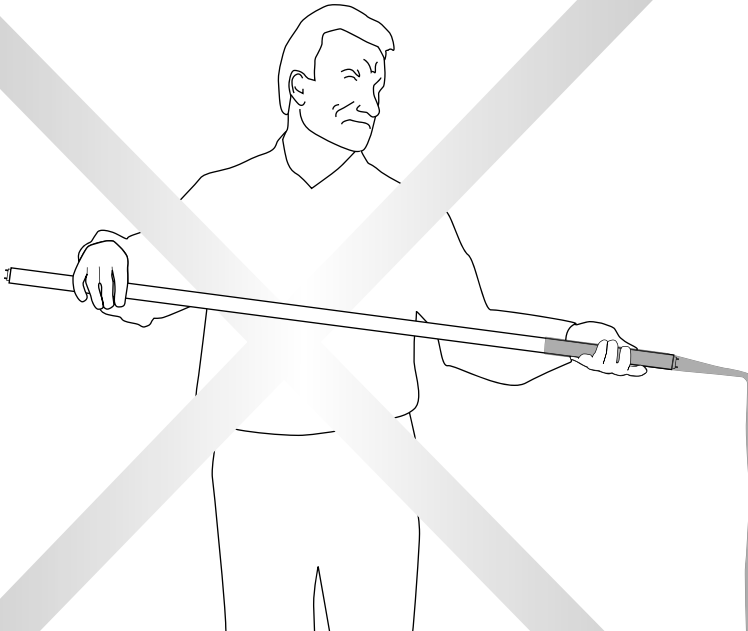

CORRECT

Standing, or on a ladder, make sure that the GamTube™ is in one hand and hanging straight down. In the other hand hold the fluorescent lamp and insert the tip into one end of the GamTube™. Keeping the GamTube™ hanging in a straight down (vertical) position, gently slide the fluorescent lamp into the GamTube™.

You may also install GamTube™ on a tabletop by laying the GamTube™ flat on the table and opening one end. Grab the fluorescent tube, in the flat out (horizontal) position, and slide it gently into the GamTube™.

WRONG

Do not insert the lamp at an angle, as this will allow the GamTube™ to fold into a crease that will cause the leading end of the fluorescent lamp to drag and catch. This slows down the process of putting the GamTube™ on the fluorescent lamp.
